CLEAN COIL PROGRAM

1 CLEANING

Clean condenser and evaporator coils with Nu-Calgon's quality products that are designed to restore efficiency and maintain indoor air quality.

2 PROTECTION

Apply one of Nu-Calgon's treatment products such as Cal-Shield® or DuraCoil™ to provide residual protection on your coils.

3 CONTROL

Bio-Fresh® cd will help prevent and control harmful biological growth on the evap coil, ductwork, and surrounding surfaces.

4 PREVENTION

Place Pan-Treat®, Gel Tabs™, or another Nu-Calgon condensate treatment in the condensate pan for protection from back-ups and overflows.

Install iWave® or NuShield® in your system to ensure the cleanest and freshest air in your space.

Scorpion™ UVC-LED is the most advanced solution for keeping your evaporator coil free and clear of bacteria, viruses, and mold.
