

DIRECTIONS FOR USE IN ICE MACHINES & COFFEE BREWERS:

1. Leave ice machine pump in operation but turn off refrigeration.
2. Drain unit and refill with fresh water.
3. Add Liquid Ice Machine Cleaner to water in unit. Use 8 fluid ounces for up to 3 gallons of water, or one fluid ounce of product for every 48 fl. oz. (3 pints) of water.
4. Allow cleaner to circulate for about 30 minutes. If solution does not contact all scaled surfaces use a brush to get cleaning solution to those parts. If scale is extra heavy, another dose of cleaner may be necessary. Ice machine drums may be cleaned by adding bottle of cleaner to a glass or plastic container holding two quarts of water and brushing the solution on the scaled surfaces.

5. After scale has been removed, drain out all the water and flush thoroughly with fresh water
NOTE: DO NOT use on nickel plated or galvanized surfaces. On these surfaces, you should use Nu-Calgon's Nickel-Safe Ice Machine Cleaner. Do not mix with chlorine bleach.

DIRECTIONS FOR USE IN COOLING TOWERS:

Ice Machine Cleaner also does an excellent job of removing lime scale from cooling towers and other cooling water systems. It does not attack copper, brass, or steel as rapidly as hydrochloric or muriatic acid based liquid scale remover.

1. Before cleaning, check spray nozzles and water distribution holes and clean them out.
2. Drain and flush out the sump. Refill with fresh water and start pump again. Shut off bleed to conserve acid during cleaning.
3. As a starting dosage use 1 gallon of Ice Machine Cleaner for each 30 gallons of water in the system.
4. The acid solution should be circulated for several hours depending upon thickness and type of scale. Add additional acid as required to keep cleaning solution strongly acid as shown by pH test strips.
5. One can usually tell when the equipment is clean by observing the cleaning solution returning from the condenser. When the returning solution has remained strongly acid for 30 minutes and does not contain any bubbles or foam, it is a sign that all of the lime scale has been removed.
6. Drain and flush the system twice, then refill with fresh water and open the bleed-off line.
7. See your wholesaler for products to further inhibit scale formation.

Nu-Calgon

Liquid Ice Machine Cleaner

FOOD GRADE

*A Safe and Effective Descaler
for Ice Machines*

Highly Concentrated

Nonfood Compounds
A3
Registration # 145305

FOR PROFESSIONAL USE ONLY

1 U.S. Gallon (3.8 liters)

LIQUID ICE MACHINE CLEANER

DANGER: Causes severe skin burns and eye damage. May be corrosive to metals.
PREVENTION: Do not breathe mist or vapour. Wash thoroughly after handling. Wear protective gloves, protective clothing, eye protection and face protection. Keep only in original packaging.
RESPONSE: Absorb spillage to prevent material-damage. **IF SWALLOWED:** Rinse mouth. Do NOT induce vomiting. **IF ON SKIN (OR HAIR):** Take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse. **IF INHALED:** remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor. Specific treatment (see information on this label). **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. **STORAGE:** Store locked up. Store in a corrosion resistant container with a resistant inner liner. **DISPOSAL:** Dispose of container in accordance with local, regional, national and international regulations. **KEEP OUT OF REACH OF CHILDREN.**

NETTOYANT LIQUIDE POUR MACHINE À GLACE

DANGER : Provoque de graves brûlures de la peau et de graves lésions des yeux. Peut être corrosif pour les métaux.
PRÉVENTION : Ne pas respirer les brouillards ou les vapeurs. Se laver soigneusement après manipulation. Porter des gants, vêtements de protection, équipement de protection des yeux et du visage. Conserver uniquement dans l'emballage d'origine.
INTERVENTION : Absorber toute substance répandue pour éviter qu'elle attaque les matériaux environnants.
EN CAS D'INGESTION : Rincer la bouche. Ne PAS faire vomir. **EN CAS DE CONTACT AVEC LA PEAU (OU LES CHEVEUX) :** Enlever immédiatement tous les vêtements contaminés. Rincer la peau à l'eau ou se doucher. Laver les vêtements contaminés avant réutilisation. **EN CAS D'INHALATION :** Déplacer la personne à l'air frais et la maintenir dans une position confortable pour la respiration. Appeler immédiatement un CENTRE ANTIPOISON ou médecin. Traitement particulier (consulter cette étiquette pour information). **EN CAS DE CONTACT AVEC LES YEUX :** Rincer avec précaution à l'eau pendant plusieurs minutes. Enlever les lentilles de contact si la victime en porte et si elles peuvent être facilement enlevées. Continuer à rincer. Garder sous clef. **STOCKAGE :** Stocker dans un récipient résistant à la corrosion avec doublure intérieure. **ÉLIMINATION :** Éliminer le récipient conformément à la réglementation locale, régionale, nationale et internationale. **GARDER HORS DE LA PORTÉE DES ENFANTS.**
