The unique ClenAir odor neutralizer gel formula has been successfully used to safely eliminate odors in homes, offices, schools, HVAC Systems, restaurants, hospitals, labs, hotels, basements, vehicles, boats, and many other applications for more than 20 years.

ClenAir Odor-Block is not a perfume mask or cover-up. It is a true odor neutralizer that molecularly reacts with the odor causing compounds and eliminates them and other indoor pollutants leaving a clean, fresh scent behind.

ClenAir Odor-Block makes it easy to improve the indoor air quality in the entire home or building by treating the air through the HVAC system.

Directions: One HVAC Odor-Block will treat up to a 3 ton A/C system or 100,000 BTU heating system. For larger systems or severe odor problems, use multiple Odor-Blocks. Carefully open the box top and remove the plastic wrapped Odor-Block from the box. Remove the protective plastic and insert the bare Odor-Block back into the box. Hang or place the Odor-Block box on or near the air filter or in the blower compartment or any other accessible place in the return duct system. The specially vented box will allow the Odor-Block to slowly evaporate into the HVAC system treating all of the system air. For faster treatment or severe odors, the box top can be left open or ajar. When the Odor-Block is completely shrunk and dried, it is time to replace it with a new Odor-Block. Lasts up to two months.

CAUTION: Keep away from children.

May be harmful if swallowed. Store in a cool place. Contents may liquefy at temperatures above 125 F and will resolidify at cooler temps without impairing efficiency of product.

Easy to Use...

1. Just remove the protective plastic from the ClenAir Odor-Block.
2. Place the bare Odor-Block back into the box.
3. Place the box near the air filter or in the return ductwork. If placement is near the blower, use the enclosed tie to secure the box.

Shown are two typical Odor-Block placements in an HVAC system.
