

A/C Re~New is a unique product which provides dramatic, year-round improvement in the efficiency and performance of air conditioning and heat pump systems. It is compatible with all commonly used refrigerants, oils and system materials, and it has no chlorinated compounds.

A/C Re~New is designed to work with the existing system oil, and it may be used in any CFC, HCFC and HFC air conditioning applications:

- Residential Air Conditioning
- Commercial Air Conditioning (split system, packaged)
- Chillers

Read instructions carefully.

DIRECTIONS FOR USE:

This product must be used in accordance to the following directions by HVACR professionals only.

1. For systems up to 5 tons, use 4 fl. oz. of A/C Re~New. For larger systems, use an amount of A/C Re~New equal to 10% of system oil volume. In systems over 10 tons, it is recommended that an equal volume of oil be removed. If oil volume is unknown, use 1.0 fl. oz. of A/C Re~New per ton.
2. Charge A/C Re~New through the low side service port using the Universal Treatment Injector Tool (P/N 4779-0) or any other commercially available injector to safely transfer product into the HVAC system. Refer to Nu-Calgon bulletin 3-80 for detailed instructions.
3. Use standard air conditioning, refrigeration service techniques and practices at all times.
