

**Instructions for Use: For use by HVACR professionals only.**

**LOADING A NEW MAG 20 CARTRIDGE:**

1. Unscrew and remove the trigger of the Gallo Gun® from the base.
2. Place the new Mag 20 CO<sub>2</sub> cartridge in the base of the Gallo Gun®.
3. Replace the trigger on the base. Ensure the threads are properly aligned.
4. While firmly holding the tool with the cartridge in an upright position, screw in the trigger until the cartridge just contacts the puncture pin and then quickly and firmly twist it in until it stops. This will prevent loss of CO<sub>2</sub> gas.

**USING THE GALLO GUN®:**

1. Make sure the hose and cone are tight before clearing a new line.
2. Firmly press the cone on the drain line or drain opening to be cleared and be sure the cone makes a complete seal.
3. Press the trigger button on the Gallo Gun® firmly for a burst of gas (about a two to three second burst). The drain should clear, and you will have a second burst left to make sure the drain line is cleared or clear a second line.

**PRECAUTIONS:** Always check the Gallo Gun® and hose assembly for damage before use. Only use Mag 20 or Mag 16 cartridges in the Nu-Calgon Gallo Gun®.

**IMPORTANT!** Make sure to completely discharge any unused gas and remove the cartridge after use. This will extend the life of the tool.
