

### FEATURES

**Long-Lasting Bubbles:** Extended bubble life ensuring reliable detection of gas leaks.

**Surface Adhesion:** High viscosity formulation clings to surfaces for superior contact time, enabling the detection of the smallest leaks in the system.

**Ideal for Food Processing Areas:** Safe for use in and around food processing areas. Note: Remove or cover all food products during use.

**Versatile Application:** Works with all refrigerants including A2L, natural gas, and oxygen.

**Compatible with Fluorescent Dyes:** Suitable for use on systems utilizing fluorescent dyes, without causing interference with ultraviolet or blacklight detection.

**Freeze Protection:** Resistant to freezing at temperatures as low as 5°F and capable of withstanding temperatures up to 225°F.

**Non-Corrosive, Biodegradable, and Freeze Thaw Stable:** The most advanced gas leak detection formula on the market!

### DIRECTIONS:

For use by HVACR professionals only

**Prepare Surface:** Ensure the system is pressurized and all safety measures are in place.

**Application:** Liberally spray a uniform coating on surfaces suspected of leaks.

**Visual Inspection:** Look for signs of white foam or formation of small bubbles.

**Patience is Key:** Bubbles will form instantly in most applications. For micro leaks, allow 5 minutes for the solution to work.

**Check Fittings:** Inspect the bottom of all fittings for foam or small bubbles.

**Response to Leaks:** If a leak is detected, consider using Nu-Calgon's EasySeal if the situation is appropriate.

**Cal-Blue+**  
MICRO GAS LEAK DETECTOR

For All Refrigerant Systems

Freeze Protected to 5°F

Detects Microscopic Leaks

Nonfood Compounds  
P1

Cal-Blue+ is formulated to find the smallest leaks in your system. Discover the exceptional performance of Cal-Blue+, one of the most versatile gas leak detectors for detecting even the tiniest gas leaks with precision and efficiency. The unique formulation is non-corrosive and engineered to meet the needs of today's service technicians. Trust Cal-Blue+ to ensure confidence when gas leak detection is required.

**PREVENTION:** Observe good industrial hygiene practices.

**RESPONSE:** Wash hands after handling.

**STORAGE:** Store away from incompatible materials.

**DISPOSAL:** Dispose of waste and residues in accordance with local authority requirements.

**KEEP OUT OF REACH OF CHILDREN.**

**CONTAINS:** Propylene Glycol (CAS# 57-55-6).
