Gallo Gun
(4179-01)

Perfect for clearing
out clogged tees.

INFLATABLE DRAIN OPENER

4179-05

The Gallo Gun Cannon is an inflatable drain opening accessory specifically engineered to quickly and easily clear clogged 3/4" PVC condensate drain lines through the existing 3/4" tee. Simply drop the Cannon into the cleanout/vent tee on your drain line, push the trigger, and the Cannon will inflate creating an airtight seal while instantly clearing the clog in your drain line. The Cannon works with vent openings, access fittings, or tees installed on the HVAC drain line and ensures your clogged drain line gets cleared the right way every time!

The Cannon is designed to be used with the Nu-Calgon Gallo Gun 4179-01, but it will also work with many other CO₂ drain guns in the market.

INSTRUCTIONS FOR USE: For HVACR professionals only.

1. Thread the Gallo Gun Cannon hose onto the Gallo Gun 4179-01.
2. Load a new Mag 20 (4179-20) or Mag 16 (4179-16) in the Gallo Gun.
3. Insert the Gallo Gun Cannon into the tee or access opening on your drain line. Ensure that the Cannon is past the connection that leads into the evaporator.
4. Once the Cannon is in the drain line past the connection to the evaporator coil simply press the trigger of the Gallo Gun. The Cannon will instantly inflate to create an airtight seal in the drain line and the force of the CO₂ will clear the clogged drain line.

IMPORTANT: Do not inflate the Cannon outside of a drain line.
