

Cal-Blue LT is an advanced solution designed to pinpoint the smallest leaks within your system. Cal-Blue LT is a highly versatile gas leak detector designed with a high viscosity, non-corrosive formulation to identify even the slightest gas leaks. Engineered to withstand temperatures down to -20°F, Cal-Blue LT is tailored to meet the demands of modern service technicians. Rely on Cal-Blue LT for assured confidence in all your gas leak detection needs.

FEATURES

Long-Lasting Bubbles: Extended bubble life ensuring reliable detection of gas leaks.

Surface Adhesion: High viscosity formulation clings to surfaces for superior contact time, enabling the detection of the smallest leaks in the system.

Ideal for Food Processing Areas: NSF listed and safe for use in and around food processing areas. Note: Remove or cover all food products during use.

Versatile Application: Works with all refrigerants including A2L, natural gas, and oxygen.

Compatible with Fluorescent Dyes: Suitable for use on systems utilizing fluorescent dyes, without causing interference with ultraviolet or blacklight detection.

Freeze Protection: Resistant to freezing at temperatures as low as -20°F and capable of withstanding temperatures up to 225°F.

Non-Corrosive, Biodegradable, and Freeze Thaw Stable: The most advanced gas leak detection formula on the market!

 Nu-Calgon

Cal-Blue LT
LOW TEMP MICRO
GAS LEAK DETECTOR

For All Refrigerant Systems

Freeze Protected to -20°F

Detects Microscopic Leaks

For Professional Use Only.
Keep Out Of Reach Of Children.

32 fl. oz. (1 Quart) (946mL)

 Nu-Calgon

DIRECTIONS: For use by HVACR professionals only

Prepare Surface: Ensure the system is pressurized and all safety measures are in place.

Application: Liberally spray a uniform coating on surfaces suspected of leaks.

Visual Inspection: Look for signs of white foam or formation of small bubbles.

Patience is Key: Bubbles will form instantly in most applications. For micro leaks, allow 5 minutes for the solution to work.

Check Fittings: Inspect the bottom of all fittings for foam or small bubbles.

EasySeal
ULTIMATE

Response to Leaks: If a leak is detected, consider using Nu-Calgon's EasySeal if the situation is appropriate.

Sprayer Tip: Twist the sprayer tip to the off position when not in use.

PREVENTION: Observe good industrial hygiene practices.

RESPONSE: Wash hands after handling.

STORAGE: Store away from incompatible materials.

DISPOSAL: Dispose of waste and residues in accordance with local authority requirements.

KEEP OUT OF REACH OF CHILDREN.

CONTAINS: Propylene Glycol (CAS# 57-55-6).
