Food Service Filtration

Nu-Plus EV

Description

Nu-Plus EV, is a new and cost-conscious water filtration system for food service applications. These sanitary quick change cartridges are designed to fit existing high-flow applications. The Nu-Plus EV products provide you with high-flow filtration technology for all of your water using equipment: Ice machines, fountain beverage, steam ovens, and drinking water applications. Nu-Plus EV is the easy and reliable choice when looking to replace existing high-flow cartridges, without replacing the entire system.

Packaging:

Nu-Plus EV Ice	4623-80	(6x1 case)
Nu-Plus EV Fountain	4623-81	(6x1 case)
