- Eliminates odors and improves overall Indoor Air Quality
- Unique slow-release package, designed to ensure a longer life
- A true odor neutralizer, not a mask or cover-up
- Multi-vent ports for maximum odor control
- Solutions for standard ducted residential, commercial, and now also ductless systems
- HVAC Odor Block: 3-ton system for 2 months
- HVAC Odor Block XL: 2,500 sq ft for 6 months
- Commercial HVAC Odor Block: 10–15-ton system for 4 months
- NEW! HVAC Odor Block Mini: 18,000 BTU system or 2-Ton system for 3 months

Odor Neutralizers

HVAC Odor Block

Description

The HVAC Odor Block is not a perfume mask or cover-up; it is a true odor neutralizer. The unique formula reacts with the odor-causing compounds and eliminates them leaving the air smelling clean and fresh. The HVAC Odor Block makes it easy to remove odors and improve the indoor air quality in the entire home or building by treating the air through the HVAC system. No matter the system type from ductless to residential to large commercial the HVAC Odor Block line-up will help eliminate odors caused by mold, mildew, bacteria, pets, smoke, water damage, fire damage, paints, garbage areas, sewer gases, and more! All HVAC Odor Block sizes utilize the popular Fresh Linen odor neutralizing gel. The Commercial HVAC Odor Block also includes a layer of Carbon Z activated carbon to help reduce harmful VOCs.

Application

Use the HVAC Odor Block Mini in ductless applications, and use the HVAC Odor Block, HVAC Odor Block XL, and Commercial HVAC Odor Block in ducted A/C units, furnaces, rooftop units, fan coil units, and air handlers. The HVAC Odor Block Mini will treat up to an 18,000 BTU or 2-ton system for 3 months. The HVAC Odor Block will treat up to a 3-ton system for 2 months. The HVAC Odor Block XL will treat up to 2,500 square feet for 6 months. The Commercial HVAC Odor Block, which includes the unique Carbon Z activated carbon, will treat up to a 15-ton system for 4 months.

HVAC Odor Block Mini	6106-50

Directions

HVAC Odor Block: 6106-00

1. Carefully open the box top and remove the plastic wrapped gel odor block from the box.
2. Put the bare gel odor block back into the box.
3. Using the provided zip-tie, secure the HVAC Odor Block box on or after the return air filter, in the blower compartment, or any other accessible place in the system. The specially vented box will allow the gel odor block to slowly evaporate into the HVAC system treating all the system air.

   3a. For faster treatment or severe odors, the box top can be left open to expose more of the gel odor block.
4. When the inner gel odor block is completely shrunk or dried, it is time to replace it with a new HVAC Odor Block. A single HVAC Odor Block lasts up to 2 months in a system up to 3-tons.

HVAC Odor Block XL: 6107-00

1. To activate the HVAC Odor Block XL, use a utility knife to cut away the plastic from the oval vents on opposing sides of the box. The gel odor block stays inside the box.
2. Place the HVAC Odor Block XL after the return air filter, in the blower compartment, or any other accessible place in the system.

   2a. For faster treatment or severe odors, open the box top and remove the entire gel odor block from the plastic inner housing and place the bare gel odor block back into the box and close the top.
3. When the inner gel odor block is completely shrunk or dried, it is time to replace it with a new HVAC Odor Block XL. A single HVAC Odor Block XL lasts up to 6 months in system treating up to 2,500 sq ft.

Commercial HVAC Odor Block: 6106-10

1. To activate the Commercial HVAC Odor Block, first carefully peel away the top label to expose the vent openings and the gel odor block.
2. To activate the Carbon Z filtration, peel away the two lower panel labels on opposing sides to expose the side vent openings and Carbon Z.
3. Place the Commercial HVAC Odor Block box after the return air filter or other convenient place in the system. Be sure to place the pail so the carbon openings are in the direction of the airflow.
4. When the inner gel odor block is completely shrunk or dried, it is time to replace it with a new Commercial HVAC Odor Block. A single Commercial HVAC Odor Block lasts up to 4 months in a system up to 15-tons.

HVAC Odor Block Mini: 6106-50

1. To activate the HVAC Odor Block Mini, use a utility knife to cut away the plastic from the 6 oval vents on opposing sides of the box. The gel odor block stays inside the box.
2. Place the HVAC Odor Block Mini on the return louvers on the top of the mini-split head, or inside of the PTAC unit.
3. When the inner gel odor block is completely shrunk or dried, it is time to replace it with a new HVAC Odor Block Mini. A single HVAC Odor Block Mini lasts up to 3 months in a system up to 18,000 BTU or 2-tons.
